

YEEES 27, Technische Universität Berlin

Thursday, October 10, 2019	
07:30-09:00	5k Run through Brandenburg Gate Sign-up: mlr@wip.tu-berlin.de
08:30-09:00	Welcome Coffee & Vitamins
09:00-10:30	<u>Session 1 (Leonard Göke)</u> - Utilizing the max-p algorithm to reduce the impact of spatial scale on power system models with high solar and wind power penetration <i>Christian Fleischer, Europa-Universität Flensburg</i> - A novel method for treating short term uncertainty in generation expansion planning <i>Sebastian Gonzato, KU Leuven</i>
10:30-11:00	Coffee & Vitamin Break
11:00-12:30	<u>Session 2 (Dawud Ansari)</u> - Recharge infrastructure projects: did they really boost the French electric vehicle market? <i>Bassem Haidar, CentraleSupélec/Groupe PSA</i> - The EU ETS' effect on environmental and economic performance of Swedish firms <i>Sandra Schusser, Swedish University of Agricultural Sciences</i>
12:30-13:30	Lunch
13:30-15:45	<u>Session 3 (Dr. Wolf-Peter Schill, Richard Weinhold)</u> - The impact of grid models on the determination of congestion management in Austria <i>Lukas Maximilian Lang, Technische Universität Wien</i> - Markets for Direct Current Distribution Systems: Towards Energy-based vs. Flex-based Designs <i>Longjian Piao, TU Delft</i> - The effectiveness of using battery storage to reduce a residential building's primary energy use or CO₂-emissions <i>Sam Hamels, Ghent University</i>
15:45-16:15	Coffee & Vitamin Break
16:15-17:45	<u>Session 4 (Prof. Christian von Hirschhausen, Mario Kendzior)</u> 100% Renewables in North America - Spatial Distribution under different Network Restrictions <i>Elmar Zozmann, Technische Universität Berlin</i> 100 Percent Renewable Distributed Generation Resources and Their Interaction with Transmission Development - A Stylized Case Study on the German Power System <i>Hendrik Kramer, Technische Universität Berlin</i>
19:00	<u>Social Event</u> with snacks and music

Friday, October 11, 2019	
08:30-09:00	Welcome Coffee & Vitamins
09:00-10:30	<u>Session 5 (Prof. Anne Neumann)</u> - Renewable uncertainty and its impacts on market prices <i>Philip Schnars, Universität Hamburg</i> - Access to electricity in Sub-Saharan Africa: the regressive effect of tariff schedules on urban and rural on-grid households <i>Alexis Vessat, Centre national de la recherche scientifique</i>
10:30-11:00	Coffee & Vitamin Break
11:00-12:30	<u>Session 6 (Prof. Franziska Holz, Dr. Astrid Cullmann)</u> - RES-E for Climate Protection – How to measure their impact? <i>Carl-Philipp Anke, Technische Universität Dresden</i> - The political economy of fossil fuel subsidy reform: An analytical and empirical assessment <i>Mariza Montes de Oca Leon, DIW Berlin</i>
12:30-13:30	Lunch
13:30-17:30	YEEES participants can join the talks at INFRADAY

How to get there?

YEEES 27 takes place at Technische Universität Berlin's main campus. You can find **room H 3143** in the main building at **Straße des 17. Juni 135, 10623 Berlin**. The campus can easily be reached by the underground line U2, station **Ernst-Reuter-Platz** or by all light-rail ("S-Bahn") lines stopping at station **S Tiergarten** (S3, S5, S7, S9).

Emergency Contact

5k Run

This time, there will be the first ever YEEES 5k Run. The run will take place in *Großer Tiergarten*, hence we will pass some of Berlins most notable sights such as *Brandenburg Gate* and *Siegessäule*. The run will start and end near *Potsdamer Platz*. You can easily get to and from there with the underground line U2, which will get you directly to TU Berlin, as well. After the run, there will be the possibility to take a shower and change at the university gym. We will begin the run at 7.30 a.m. We advise you to be at the meeting point at least 10 minutes early, so we can start punctually, and nobody misses their first session of the day. If you would like to participate, please sign up via email to mlr@wip.tu-berlin.de. We will send a detailed description of the starting point to all participants of the run.
