

YEEES SPRING 2022 PROGRAMME

	Thursday May 12	
Time	Room 1: Faculty Council Room	Room 2: Buffer
8:30 – 9:10	Coffee	
9:10 – 9:30	Sam Hamels <i>Welcome to YEEES!</i>	
9:30 – 10:20	Manuel Perez Bravo <i>Improving the representation of transport demands in TIMES models: A case of study for the Spanish 2030 transport decarbonization goals</i> JR: Björn Steigerwald SR: Dr. Christophe Heyndrickx	Michael von Bonin <i>Electric Vehicles Driving and Charging Profile Modeling Framework to Analyze Conflicts and Synergies of Market Optimized Charging of Electric Vehicles on Low Voltage Grids</i> JR: Antonia Golab SR: Prof. Jan Desmet
10:20 – 11:10	Paul Waidelich <i>Credit provision for immature low-carbon technologies: Assessing green state investment banks under experience feedbacks</i> SR: Prof. Koen Schoors	Arne Lilienkamp <i>Integrating EVs - Smart Charging and Its Impact on Distribution Grids</i> JR: Magnus Schauf SR: Dr. Jelle Meus
11:10 – 11:30	Coffee Break	
11:30 – 12:20	Philipp Mascherbauer <i>Impact of variable electricity price on heat pump operated buildings</i> JR: Berit Hanna Czock SR: Dr. Jens Weibezahn	
12:20 – 13:40	Lunch Break	

	Thursday May 12	
13:40 – 14:30	Tamás Borbáth <i>Model-based Approaches to Demand Curtailment Allocation</i> JR: Febin Kachirayil SR: Dr. Richard Weinhold	Laura Van den Berghe <i>Community participation in electricity markets: the impact of market organisation</i> JR: Iná Maia SR: Prof. Johan Albrecht
14:30 – 15:20	Pietro Lubello <i>Estimation of load shifting impact on energy expenses and self-consumption in the residential sector</i> JR: Ebbe Kyhl Gøtske SR: Dr. Niels Govaerts	Alicia Bassiere <i>Optimal investment strategy in renewable power under demand uncertainty</i> JR: Antonio F. Rodríguez Matas SR: Dr. Tim Mertens
15:20 – 15:40	Coffee Break	
15:40 – 16:30	Berit Hanna Czock <i>Pump it up? Regulatory Pathways for Technology Driven Decarbonization of Residential Buildings in Germany</i> JR: Philipp Mascherbauer SR: Dr. Sam Hamels	Johannes Brauer <i>Green hydrogen – How green does it really have to be?</i> JR: Luis Alberto Herrero Rozas SR: Dr. Kenneth Bruninx
16:30 – 17:20	Björn Steigerwald <i>Uncertainties in Estimating Production Costs of Future Nuclear Technologies – A Model-based Analysis of SMR (“small modular reactors”)</i> JR: Manuel Perez Bravo SR: Joannes Laveyne	Luis Alberto Herrero Rozas <i>Integration of green hydrogen generation in the MIBEL: a long-term analysis</i> JR: Johannes Brauer SR: Dr. Kenneth Bruninx
17:20 – 18:30	FREEDOM	
18:30 – 20:30	Conference dinner Restaurant: Antichi Saporì (google maps location) Address: Sint-Pietersnieuwstraat 204, 9000 Gent	

	Friday May 13	
Time	Room 1: Faculty Council Room	Room 2: Buffer
9:00 – 9:30	Coffee	
9:30 – 10:20	Jonas Zinke <i>The place beyond the lines - efficient storage allocation in a spatially unbalanced power system with a high share of renewables</i> JR: Michiel Kenis SR: Prof. Lieven Vandevelde	
10:20 – 11:10	Ebbe Kyhl Gøtske <i>Requirements and impacts of energy storage characteristics in a highly renewable European energy system</i> JR: Pietro Lubello SR: Dr. Pieter Vingerhoets	Michiel Kenis <i>Impact of an off-shore bidding zone under flow-based market coupling for an optimal integration of wind power</i> JR: Jonas Zinke SR: Prof. Lieven Vandevelde
11:10 – 11:30	Coffee Break	
11:30 – 12:20	Dominic Lencz <i>Analysing the effect of green self sufficiency</i> JR: Ellen Beckstedde SR: Em. Prof. Ronnie Belmans	Claire Halloran <i>Assessing the regional value of residential heating flexibility for power generation and storage planning</i> JR: Athir Nouicer SR: Prof. Marten Ovaere
12:20 – 13:40	Lunch Break	
13:40 – 14:30	Antonio F. Rodríguez Matas <i>A novel application of a robust and flexible decision-making methodology to a dynamic model of strategic energy planning</i> JR: Alicia Bassiere SR: Em. Prof. Ronnie Belmans	Magnus Schauf <i>Learning, Scale, and Competition Effects in Distributed Battery Storage</i> JR: Arne Lilienkamp SR: Prof. Marten Ovaere

	Friday May 13	
14:30 – 15:20	Sebastian Zwickl-Bernhard <i>Designing a model for the cost-optimal decommissioning and refurbishment investment decision for gas networks: application on a real test bed in Austria until 2050</i> JR: Chenyan Lyu SR: Prof. Johan Albrecht	Ellen Beckstedde <i>The impact of the balancing responsibility on the trade-off between flexibility contracting and distribution network investments</i> JR: Dominic Lencz SR: Dr. Jelle Meus
15:20 – 15:40	Coffee Break	
15:40 – 16:30	Iná Maia <i>Statistical matching using logistic regression: an approach to set up a techno-socio-economic dataset with EU-SILC and HBS data</i> JR: Laura Van den Berghe SR: Sam Hamels	Athir Nouicer <i>Demand-side flexibility in distribution grids: voluntary versus mandatory contracting</i> JR: Claire Halloran SR: Prof. Marten Ovaere
16:30 – 17:20	Antonia Golab <i>Spatio-temporal modeling of fast-charging along highway networks for stress-testing planned charging infrastructure capacity</i> JR: Michael von Bonin SR: Joannes Laveyne	Febin Kachirayil <i>Assessing the contribution of residential load shedding in decentralized energy systems</i> JR: Tamás Borbáth SR: Prof. Marten Ovaere
17:20 – 18:30	FREEDOM	
18:30 – ...	Those that want to can go for food and drinks together
