

June 3	
09.45 – 10.15	Introduction and welcome coffee
10.15 – 12.30	Residential electricity pricing and markets • Jens Weibezahn: Pricing mechanisms and market designs in peer-to-peer electricity trading • Yuting Mou: How do you pay for electricity in the future? - The design of a capacity and energy based price menu for residential consumers • Seungman Lee: Optimization and simulation based cost-benefit analysis on a residential demand response: applications to the South Korean and French demand response mechanisms
12.30 – 13.30	Lunch
13.30 – 15.00	Social and industry perspective • Mathilde Tessier: Shaping social acceptance of energy projects • Sevkay Ozgur: Cross-border oil and gas mergers and acquisitions and its geography-based comprehensive overview
15.00 – 15.15	Coffee break
15.15 – 17.30	Investment planning policy • Anselm Eicke: Locational investment signals: how to incentivise the “right” location of power plants? • Roel Nagy: Green capacity investment under subsidy withdrawal uncertainty • Iolanda Saviuc: Economic performance of adding electricity storage to PV-powered European residential microgrids under existing support schemes and capacity tariffs

June 4	
08.45 – 09.00	Introduction and welcome coffee
09.00 – 10.30	Investment planning models • Marija Miletic: Planning investments in energy storage and generators using linear and binary decision rules • Tim Mertens: Representing cross-border trade in long-term power system planning models with limited geographical scope
10.30 – 10.45	Coffee break
10.45 – 12.15	Buildings • Oliver Ruhnau: Heating with the wind: building heat pumps and variable renewables • Sasan Rafii-Tabrizi: Optimal operation of a cluster of commercial and residential nearly-zero energy buildings
12.15 – 13.30	Lunch
13.30 – 15.00	Sector coupling • Anna Schwele: Arbitrage options enhancing the coordination of power and natural gas markets under uncertainty • Mario Kendzierski: Flexible sector coupling in high-RES scenarios: impacts on electrical storage
15.00 – 15.15	Coffee break
15.15 – 16.45	Reserve markets • Adriano Arrigo: Distributionally robust chance-constrained energy and reserve dispatch - a support-based exact approach • Mathias Hermans: On the temporal aspects of joint energy-operating reserve markets and generator start-up flexibility
